

BEAUTY IS YOU!

AFTERCARE GUIDE

# Aesthetic Hair

hair extension specialist

## Extensions Aftercare Guide

1. Use professionally recommended products that are sulphate-free, alcohol-free, and sodium chloride-free.
2. Do not get your hair wet for 48 hours after your Aesthetic Hair extensions have been installed.
3. Avoid using heavily hydrating products on the roots of your hair, as this can cause the extensions to slip out.
4. When shampooing, try not to matt or twist the extensions. Wash your hair in a downward motion to avoid tangling.
5. Always use a heat protector when styling your Aesthetic Hair extensions.
6. Do not flat iron Aesthetic Hair extensions at the roots.
7. Make sure your flat iron does not exceed 180°C.
8. Gently brush your Aesthetic Hair extensions every morning and evening, starting from the bottom and working your way up using your Aesthetic Hair extension brush.

### **Hair Extensions Installation Policy**

**A consultation is required before any new hair extension installation, allowing clients to inspect hair quality.** A non-refundable deposit is needed to book and order hair. Only use approved products: sulphate-free, alcohol-free, and sodium chloride-free. Do not wet hair for 48 hours post-install. Follow all aftercare instructions to maintain quality. Cutting, colouring, or chemical treatments may void support. No refunds are issued once hair is installed. Aesthetic Hair is not liable for damage caused by improper care.

### **Hair Extensions Maintenance Policy**

**Maintenance is recommended every 4-6 weeks.** Missed appointments may lead to tangling, slipping, or damage. Arrive with clean, dry hair unless agreed otherwise. Extra charges may apply for detangling or overdue maintenance. Maintenance includes repositioning or tightening only - no hair replacement. No refunds apply to previously installed hair. Please provide at least 24 hours' notice for cancellations or rescheduling.
